SUMIT CHOUDHARY

Mechanical Engineering Student
Major: Mechanical Engineering
Jaipur, Rajasthan, India | workwithsumitchoudhary@gmail.com | +91-8769384203 | linkedin.com/in/sumit-choudhary-7831a5400

EDUCATION

Examination	Degree/Certificate	Institute	Year
Graduation	B.Tech, Mechanical Engineering	Swami Keshvanand Institute of Technology (SKIT), Jaipur	2023-2027 (Expected)
Senior Secondary	CBSE (XII)	Oxford International Academy	2022
Secondary	CBSE (X)	Oxford International Academy	2020

SUMMARY

Mechanical Engineering student (B.Tech, expected 2027) with hands-on exposure to CNC machining, robotics and control systems, and data-driven analytics gained through industrial internships and industry-recognized virtual job simulations. Skilled in AutoCAD, C, and Excel/Tableau-based data analysis, with an interest in automobile engineering and strong problem-solving, adaptability, and teamwork. Seeking entry-level opportunities across various fields — including mechanical, manufacturing, and robotics engineering, as well as client-facing and sales-oriented roles — where technical grounding and clear communication add value.

WORK EXPERIENCE

SKIT College, Jaipur **3 Sep 2026**
Seminar – Electric Vehicles
- Attended a seminar on **Electric Vehicles (EVs)** covering EV powertrains, battery technology, and charging infrastructure.
- Gained insight into the industry's shift toward **electric mobility** and discussed EV design considerations with visiting speakers.

North Western Railway, Jaipur **May'26 - Jun'26**
Intern – CNC Machining & Manufacturing Operations
- Gained hands-on experience operating **FIBA CNC machines** for precision machining and component manufacturing.
- Assisted with basic **CNC programming**, machine setup, and process monitoring.
- Interpreted technical drawings and engineering **blueprints**; performed **quality inspection** to ensure dimensional accuracy.

Indian Space Academy, Delhi **May'25 - Jun'25**
Virtual Intern
- Built foundational knowledge of **space technology, aerospace systems**, and satellite design principles.
- Explored the basics of **propulsion systems, orbital mechanics, and satellite communication** architecture through guided workshops and case discussions.
- Collaborated with a small peer team on a **scaled-down satellite/CubeSat model**, applying basic structural and design considerations.

Freelance, Jaipur **Jan'25 - Mar'25**
Video Editor – YouTube Content
- Edited **YouTube videos** using **CapCut** — trimming, transitions, color correction, and audio syncing — plus captions, thumbnails, and motion graphics to boost **engagement and retention**.
- Designed accompanying graphics and thumbnails using **Canva**, and used various **AI tools** to speed up scripting, captioning, and editing workflows.
- Produced an **Instagram Reel that reached 12K+ views**, applying trending formats and pacing techniques to boost engagement.

Robotics Internship, Jaipur **Sep'23 - Aug'24**
Robotics Intern
- Completed a hands-on robotics internship covering core **robotics and control** fundamentals.
- Assembled and calibrated **robotic arm components**, testing motion accuracy and repeatability across trial runs.
- Wrote basic **control logic** to automate simple pick-and-place and movement sequences.
- Gained **on-site exposure to drones and robots** used in today's technology, observing their real-world applications.

SKIT College, Jaipur **15-31 July 2024**
Summer Intern – In-House Training
- Completed an in-house summer training program focused on **project management** fundamentals for engineering teams.
- Learned to plan and scope small projects using **timelines, task breakdowns, and milestone tracking**.
- Practiced **resource allocation and risk identification** on mock engineering projects under faculty guidance.

CERTIFICATIONS & VIRTUAL JOB SIMULATIONS (AUG 2026)

- **Johnson & Johnson – Robotics and Controls Job Simulation**: Troubleshot robotic arm performance, analyzed sensor alignment and control systems, and proposed/tested design modifications via simulation using **Python**.
- **Deloitte Australia – Data Analytics Job Simulation**: Performed data cleaning, analysis, and dashboard creation using **Excel** and **Tableau** on real-world datasets.
- **Tata Group – GenAI-Powered Data Analytics Job Simulation**: Applied **GenAI** tools for data exploration, visualization, and business insight generation.
- **PwC US – Audit Job Simulation**: Applied Excel-based audit techniques to analyze financial data, internal controls, and risk assessment.

TECHNICAL SKILLS

Engineering & Manufacturing: CNC Machining, AutoCAD, Equipment Maintenance, Industrial Safety, Quality Inspection, Blueprint Interpretation
Robotics & Controls: Robotic Arm Troubleshooting, Sensor Alignment, Control Systems, Simulation & Iterative Testing
Data & Analytics: Data Analysis & Visualization, GenAI-Assisted Analytics, Excel, Tableau, C, Python
Sales & Client Relations: Client Communication, Negotiation, Persuasive Pitching, Relationship Building, Cold Outreach, Needs Assessment
Project Management: Project Planning, Scheduling & Milestone Tracking, Task Breakdown, Resource Allocation, Risk Identification
Tools & Collaboration: CapCut (Video Editing), Canva (Graphic Design), AI Tools, Zoom, Microsoft Teams, MS Word, MS PowerPoint, Group Discussion
Professional: Business English, Active Listening (Infosys-certified), Problem-Solving, Critical & Analytical Thinking, Teamwork
